## SFELF10M7FA00-B0

REACH

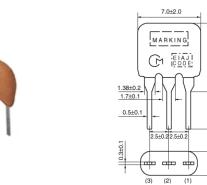

Discontinued RoHS

### Applications

Unsuitable	Please be sure to read and comply with	
Applications	these "Precautions for use."	
Specific Applications	Consumer equipment	
	Please refer to Our Website and	
	specifications, etc. for information about	
	the performance, functions, quality,	
	management, and safety required for	
	the above applications, and use	
	Products after confirming the	
	performance and reliability of the actual	
	Product.	

### Appearance & Shape

Note: This datasheet may be out of date. Please download the latest datasheet of SFELF10M7FA00-B0 from the official website of Murata Manufacturing Co., Ltd.

### Packaging Information

	Packaging	Specifications	Standard Packing Quantity
	В0	Bulk	500

SFELF10M7 series for FM-receivers are monolithic type ceramic filters that use the thickness expander mode of the piezoelectric ceramic. As part of the environment protection program, the solder for terminal plating and terminal-element connection inside of the ceramic filter contain no lead (Pb).

### Features

- 1. These miniature filters have high mechanical strength.
- 2. Low loss, favorable waveform symmetry, and high selectivity.
- 3. Various bandwidths are available for applications in wide to narrow bands.
- 4. Small dispersion and stable characteristics.
- 5. Change in center frequency is typically within  $\pm$ 30ppm/°C at -20 to +80°C.
- 6. High reliability.
