

Murata's Solution for Smart Irrigation

for agricultural applications

■ Murata's Soil Moisture Sensor

* Under Development

Murata is developing affordable, highly reliable and ease to use **Soil Moisture Sensor** that can be integrated with wireless and cloud solutions.

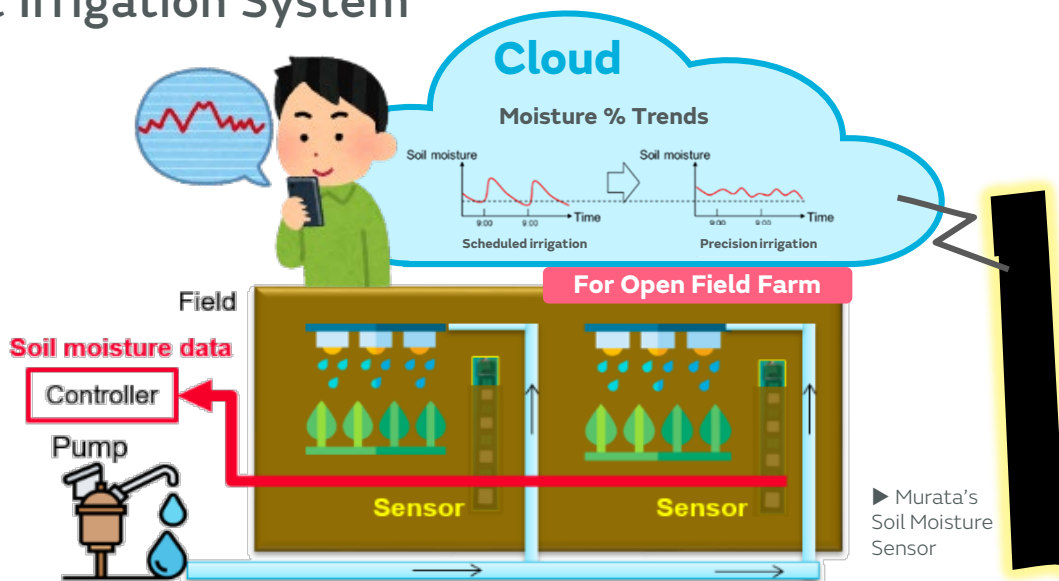

Application:

- Long term soil moisture condition monitoring for agriculture
- Automated irrigation system control by soil moisture

Benefits:

- Solution for water shortage
- Improvement of crop yield through effective utilization of resources
- Reduce of labour cost

■ Smart Irrigation System
