

Murata RFID Solution

World smallest RFID solution provider on both HF and UHF frequency for global target challenging applications which include metal and non-metal solutions. Murata's RFID systems realize reliable communication ensuring easy installation.

- Murata's RFID platform contributes to the realization of IoT, through the provision of hardware, software, and communication interfaces.

Solution Design

1

Small size
RFID tags

2

Metal mountable
and flexible RFID tags

3

PCB mountable and
solderable RFID tags

4

Compliant with
ISO 20909 and ISO 20910

5

Sufficient EPC and
user memory

Possible Applications/Use Cases

**Product Authentication
and Brand Protection**

**Inventory Control/
Logistics Tracking**

**Warranty
and Returns**

**Tool Usage and
Track and Maintainance**

**Tyre Tracking for
Inventory and
Logistics Purposes**
