

Power Supply

NXJ2 Series

Wide range of AC-DC & DC-DC power modules for Gate drive, industrial, FPGA, PoE system, server, storage and rack power data center.

Key Features / Advantageous

- Wide power selection of AC-DC and DC-DC
- Small footprint
- Low profile SMD type
- High power density
- Low noise
- Fast transient response

Key Applications / Use Cases

Medical

Industry

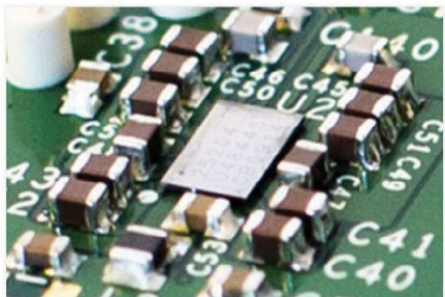

Telecom

Datacom

Products & Specifications

Product datasheet is available in Murata website @ <https://www.murata.com/en-us/products/power>

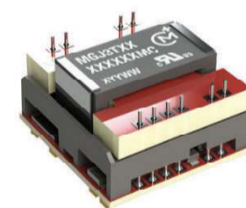

- Power Semiconductor

- Non-Isolated DC-DC converter module

- Isolated DC-DC converter module

- Isolated Gate Drive Power module

- AC-DC Converters

- Data Center & Open Compute

- Digital Panel Meters
