

1 Murata Type2EG EVK Contents

The EVK is an evaluation and application development kit for the Murata Type2EG BLE module, which is based on OnSemi's RSL15 chip. It contains the following items:

- 1 Type2EG evaluation board
- 1 USB cable

2 Power up

- Connect the USB cable to a PC or insert a BR2032 (or CR2032) battery
- The LEDs will blink rapidly
- Press the SW1 button, the LEDs will stop blinking
- Press the SW1 button again, the LEDs will restart blinking

3 Evaluation

The evaluation and testing procedure of this EVK are exactly the same as the RSL15 EVB. The RSL15 EVB's user manual can be found at OnSemi's portal below.
