

FEATURES

RoHS compliant

- 2000W (220Vac), 1200W (110Vac) Output power
- 48V Main output, 3.3V, 5V or 12V standby output
- 1U sized; dimensions 4.75"x12.00"x1.61"
- 21.9 Watts per cubic inch density
- N+1 redundancy capable, including hot-docking
- Active current sharing on main output
- Over-voltage, over-current, over-temperature protection
- Internal cooling fans
- I²C Bus Interface with status indicators

PRODUCT OVERVIEW

To B

The D1U-W-2000 is a 2000 Watt, power-factor-corrected (PFC) front-end power supply for hot-swapping redundant systems. The main output is 48V and standby output of either 12V, 5V or 3.3V. Packaged in 1U low profile, it is designed to deliver reliable bulk power to servers, workstations, storage systems or any 48V distributed power architecture systems requiring high power density. The highly efficient electrical and thermal design with internal cooling fans supports reliable operation conditions. The D1U-W-2000 is designed to auto-recover from over-temperature faults. Status information is provided with front panel LEDs, logic signals and I²C management interface. Three units can be packaged into a 19" 1U power shelf to provide up to 6.0kW of power.

| | Line and Load Regulation | | 11.6 | | 12.4 | vuc |
| 12Vsb | Ripple Voltage & Noise ¹ | 20MHz Bandwidth | | | 120 | mV p-p |
| | Operating Range | | 0 | | 1.7 | А |
| | Load Capacitance | | | | 1530 | μF |

¹ Ripple and noise are measured with 0.1 uF of ceramic capacitance and 10 uF of tantalum capacitance on each of the power supply outputs. The output noise requirements apply over a 0 Hz to 20 MHz bandwidth. A short coaxial cable with 50ohm scope termination is used.
