Features

- 1. Best suited to meet the requirements of the short-circuit test. Quick response compared with current fuse and resistor and error-free operation are assured.
- 2. Small size save board space. Capable of being mounted anywhere because Alternative is not required.
- 3. Actuates by excessive current during the short-circuit test to restrain abnormal heat generation in other circuit components and printed boards.

This state will be maintained until the abnormal state is removed or power is turned off to reset the "POSISTOR" to the original state. Surface temperature of "POSISTOR" is kept low, below a certain value, during the actuation.

 Non-contact design leads to long life and no noise.
Durable and strong against mechanical vibration and shock because it is a solid element.
