"#"at the end indicates the package specification code.

Rated current (Isat) is specified when the decrease of the initial inductance value at 30%. Rated current (Itemp) is specified when temperature of the inductor is raised 40°C by DC current. Keep the temperature (ambient temperature plus selfgeneration of heat) under 150°C. It can be considered for use with DCDC converters with a maximum voltage of 40 V or less.
