Packaging Information

Packaging	Specifications	Standard Packing Quantity
В0	Bulk(Bag)	500

1. Useful protective threshold current range with a wide temperature range.

2. Small fluctuation in the circuit due to resistance tolerance +/-10%.

3. Quick operating time due to small size compared with conventional products.

4. Best suited to meet the requirements of power supply and motor protector. Error-free operation is assured by rush current.

5. Circuit is protected until current is turned off.

6. Restores the original low resistance value automatically once the overload is removed.

7. Non-contact design leads to long life and no noise.

Durable and strong against mechanical vibration and shock because it is a solid element.

8. Lead (Pb) is not contained in the terminations.
