"#"at the end indicates the package specification code.

- 1. Small size and low profile (2.0x1.2x0.9mm). Excellent noise suppression for sets of small and thin size.
- 2. High common mode impedance at high frequency effects excellent noise suppression performance.
- 3. Various common mode impedance from 67 to 180 ohm can be used, selected depending on noise level and signal frequency.
- Suitable for differential signal line like USB2.0, IEEE1394 and LVDS, because DLW21H does not provide distortion to high speed signal transmission due to its high coupling. (USB2.0: DLW21HN900SQ2)
- 5. Small dimension enables higher density mounting

### Applications

Common mode noise suppression of signal lines in high speed and high density digital equipment such as PCs and peripherals and telecommunications equipment.
