Chip Ferrite Bead BLM31□□□□□□□SH1□
Murata Standard Reference Specification [AEC-Q200]

1. Scope
This reference specification applies to Chip Ferrite Bead for Automotive Electronics BLM31_SH Series based on AEC-Q200.

2. Part Numbering
(Ex.)                 BL    M    31    PG   601    S    H    1    L

- Operating Temperature: -55°C to +125°C
- Storage Temperature: -55°C to +125°C

Standard Testing Conditions
< Unless otherwise specified >
Temperature: Ordinary Temp. (15 °C to 35 °C)
Humidity: Ordinary Humidity (25%(RH) to 85%(RH))

< In case of doubt >
Temperature: 20°C±2 °C
Humidity: 60%(RH) to 70%(RH)
Atmospheric pressure: 80kPa to 106kPa

(Note1) Rated Current is derated as right figure depending on the operating temperature.

4. Style and Dimensions

- Equivalent Circuit
- Resistance element becomes dominant at high frequencies.
- Unit Mass (Typical value) 0.025g

MURATA MFG.CO., LTD.
5. Marking

No marking.

### Specification of Packaging

**7-1. Appearance and Dimensions (8mm-wide plastic tape)**

![Diagram of 8mm-wide plastic tape](image)

1. **Taping**
   Products shall be packaged in the each embossed cavity of 8mm-wide, 4mm-pitch and plastic tape continuously and sealed by cover tape.

2. **Sprocket hole**
   Sprocket hole shall be located on the left hand side toward the direction of feed.

3. **Spliced point**
   The cover tape has no spliced point.

4. **Missing components number**
   Missing components number within 0.025% of the number per reel or 1 pc., whichever is greater, and are not continuous. The specified quantity per reel is kept.

**7-2. Tape Strength**

1. **Pull Strength**
   - Plastic tape: 5N min.
   - Cover tape: 10N min.

2. **Peeling off force of Cover tape**
   0.2N to 0.7N (Minimum value is typical.)
   
   *Speed of Peeling off: 300mm/min
7-3. Taping Condition

1) Standard quantity per reel
   Quantity per 180mm reel : 3000 pcs. / reel
2) There shall be leader-tape (cover tape only and empty tape) and trailer-tape (empty tape) as follows.
3) Marking for reel
   The following items shall be marked on a label and the label is stuck on the reel.
   (Customer part number, MURATA part number, Inspection number (*1), RoHS marking (*2), Quantity, etc)

*1) « Expression of Inspection No. »
   (1) Factory Code
   (2) Date
   First digit : Year / Last digit of year
   Second digit : Month / Jan. to Sep. → 1 to 9, Oct. to Dec. → O, N, D
   Third, Fourth digit : Day

*2) « Expression of RoHS marking »
   (1) RoHS regulation conformity parts.
   (2) MURATA classification number

4) Outside package
   These reels shall be packed in the corrugated cardboard package and the following items shall be marked
   on a label and the label is stuck on the box.
   (Customer name, Purchasing order number, Customer part number, MURATA part number,
   RoHS marking (*2), Quantity, etc)

5) Dimensions of reel and taping (leader-tape, trailer-tape)

7-4. Specification of Outer Case

8. Caution
8-1. Rating
   Do not use products beyond the Operating Temperature Range and Rated Current.

8-2. Surge current
   Excessive surge current (pulse current or rush current) than specified rated current applied to the product may cause a
   critical failure, such as an open circuit, burnout caused by excessive temperature rise.
   Please contact us in advance in case of applying the surge current.

8-3. Fail Safe
   Be sure to provide an appropriate fail-safe function on your product to prevent from a second damage
   that may be caused by the abnormal function or the failure of our products.
8-4. Limitation of Applications
Please contact us before using our products for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property.

(1) Aircraft equipment
(2) Aerospace equipment
(3) Undersea equipment
(4) Power plant control equipment
(5) Medical equipment
(6) Disaster prevention / crime prevention equipment
(7) Traffic signal equipment
(8) Transportation equipment (trains, ships, etc.)
(9) Data-processing equipment
(10) Applications of similar complexity and/or reliability requirements to the applications listed in the above

9. Notice
This product is designed for solder mounting. Please consult us in advance for applying other mounting method such as conductive adhesive.

9-1. Land pattern designing

- Standard land dimensions (Flow and Reflow soldering)

< For BLM31AJ type >

<table>
<thead>
<tr>
<th>Type</th>
<th>Soldering</th>
<th>a (mm)</th>
<th>b (mm)</th>
<th>c (mm)</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLM31AJ Flow</td>
<td>2.4</td>
<td>4.7</td>
<td>1.2</td>
<td></td>
</tr>
<tr>
<td>Reflow</td>
<td>2.0</td>
<td>4.3</td>
<td>1.8</td>
<td></td>
</tr>
</tbody>
</table>

< For BLM31PG/BLM31SN type >

<table>
<thead>
<tr>
<th>Type</th>
<th>Rated Current (A)</th>
<th>Land pad thickness and dimension d</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>18µm</td>
</tr>
<tr>
<td>BLM31PG 1.5/2</td>
<td>1.8</td>
<td>1.8</td>
</tr>
<tr>
<td>3.5</td>
<td>2.4</td>
<td>1.8</td>
</tr>
<tr>
<td>6</td>
<td>6.4</td>
<td>3.3</td>
</tr>
<tr>
<td>BLM31SN 10~12</td>
<td>-</td>
<td>9.8</td>
</tr>
</tbody>
</table>

*The excessive heat by land pads may cause deterioration at joint of products with substrate.

<table>
<thead>
<tr>
<th>Type</th>
<th>Soldering</th>
<th>a (mm)</th>
<th>b (mm)</th>
<th>c (mm)</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLM31PG Flow</td>
<td>2.4</td>
<td>4.7</td>
<td>1.2</td>
<td></td>

<tr>
<td>BLM31SN Reflow</td>
<td>2.0</td>
<td>4.3</td>
<td>1.8</td>
<td></td>
</tr>
</tbody>
</table>

- Land dimensions on Flow soldering for 2.5mm pitch mounting

<table>
<thead>
<tr>
<th>a</th>
<th>b</th>
<th>c</th>
<th>d</th>
<th>e</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.4</td>
<td>4.7</td>
<td>1.2</td>
<td>1.3</td>
<td>1.35</td>
</tr>
</tbody>
</table>

*As for BLM31PG type, taking land pad thickness and rated current into account.

*The pattern shall be designed to above drawing to prevent causing the solder bridge when products are mounted by 2.5mm pitch flow soldering.
9-2. Soldering Conditions

Products can be applied to reflow and flow soldering.

(1) Flux, Solder

<table>
<thead>
<tr>
<th>Flux</th>
<th>Use rosin-based flux, but not highly acidic flux (with chlorine content exceeding 0.2(wt)%.) Do not use water-soluble flux.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solder</td>
<td>Use Sn-3.0Ag-0.5Cu solder</td>
</tr>
<tr>
<td>Standard thickness of solder paste :</td>
<td>100 µm to 200 µm</td>
</tr>
</tbody>
</table>

(2) Soldering conditions

- Pre-heating should be in such a way that the temperature difference between solder and ferrite surface is limited to 150°C max. Also cooling into solvent after soldering should be in such a way that the temperature difference is limited to 100°C max.
- Insufficient pre-heating may cause cracks on the ferrite, resulting in the deterioration of product quality.
- Standard soldering profile and the limit soldering profile is as follows.
- The excessive limit soldering conditions may cause leaching of the electrode and / or resulting in the deterioration of product quality.

(3) Soldering profile

- Flow soldering profile

<table>
<thead>
<tr>
<th>Temp. (℃)</th>
<th>Standard Profile</th>
<th>Limit Profile</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-heating</td>
<td>150°C, 60s min.</td>
<td></td>
</tr>
<tr>
<td>Heating</td>
<td>250°C, 4~6s</td>
<td>265°C±3℃, 5s max.</td>
</tr>
<tr>
<td>Cycle of flow</td>
<td>2 times</td>
<td>2 times</td>
</tr>
</tbody>
</table>

- Reflow soldering profile

<table>
<thead>
<tr>
<th>Temp. (℃)</th>
<th>Standard Profile</th>
<th>Limit Profile</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-heating</td>
<td>150~180°C, 90s±30s</td>
<td></td>
</tr>
<tr>
<td>Heating</td>
<td>above 220°C, 30s~60s</td>
<td>above 230°C, 60s max.</td>
</tr>
<tr>
<td>Peak temperature</td>
<td>245±3℃</td>
<td>260℃, 10s</td>
</tr>
<tr>
<td>Cycle of reflow</td>
<td>2 times</td>
<td>2 times</td>
</tr>
</tbody>
</table>
9-3. Reworking with soldering iron

- Pre-heating: 150°C, 1 min
- Tip temperature: 350°C max.
- Soldering time: 3 (+1, -0) seconds.
- Soldering iron output: 80W max.
- Tip diameter: φ 3mm max.
- Times: 2times max.

Note: Do not directly touch the products with the tip of the soldering iron in order to prevent the crack on the ferrite material due to the thermal shock.

9-4. Solder Volume

Solder shall be used not to be exceed as shown below.

\[
\frac{1}{3}T \leq t \leq T
\]

(T: Chip thickness)

Accordingly increasing the solder volume, the mechanical stress to product is also increased. Exceeding solder volume may cause the failure of mechanical or electrical performance.

9-5. Attention regarding P.C.B. bending

The following shall be considered when designing and laying out P.C.B.’s.

(1) P.C.B. shall be designed so that products are not subject to the mechanical stress for board warpage.

- Products shall be located in the sideways direction (Length: a < b) to the mechanical stress.

(2) Components location on P.C.B. separation.

- It is effective to implement the following measures, to reduce stress in separating the board.
- It is best to implement all of the following three measures; however, implement as many measures as possible to reduce stress.

<table>
<thead>
<tr>
<th>Contents of Measures</th>
<th>Stress Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Turn the mounting direction of the component parallel to the board separation surface.</td>
<td>A &gt; D *1</td>
</tr>
<tr>
<td>(2) Add slits in the board separation part.</td>
<td>A &gt; B</td>
</tr>
<tr>
<td>(3) Keep the mounting position of the component away from the board separation surface.</td>
<td>A &gt; C</td>
</tr>
</tbody>
</table>

*1 A > D is valid when stress is added vertically to the perforation as with Hand Separation. If a Cutting Disc is used, stress will be diagonal to the PCB, therefore A > D is invalid.

(3) Mounting Components Near Screw Holes

When a component is mounted near a screw hole, it may be affected by the board deflection that occurs during the tightening of the screw. Mount the component in a position as far away from the screw holes as possible.
9-6. Mounting density
Add special attention to radiating heat of products when mounting the inductor near the products with heating. The excessive heat by other products may cause deterioration at joint of this product with substrate.

9-7. Operating Environment
Do not use this product under the following environmental conditions, on deterioration of the Insulation Resistance of the Ferrite material and/or corrosion of Inner Electrode may result from the use.
(1) in the corrodible atmosphere such as acidic gases, alkaline gases, chlorine, sulfur gases, organic gases and etc (the sea breeze, Cl2, H2S, NH3, SO2, NO2, etc)
(2) in the atmosphere where liquid such as organic solvent, may splash on the products.
(3) in the atmosphere where the temperature / humidity changes rapidly and it is easy to dew.

9-8. Resin coating
The impedance value may change and/or it may affect on the product’s performance due to high cure-stress of resin to be used for coating / molding products. So please pay your careful attention when you select resin. In prior to use, please make the reliability evaluation with the product mounted in your application set.

9-9. Cleaning Conditions
Products shall be cleaned on the following conditions.
(1) Cleaning temperature shall be limited to 60°C max. (40°C max. for IPA.)
(2) Ultrasonic cleaning shall comply with the following conditions, avoiding the resonance phenomenon at the mounted products and P.C.B.
Power: 20W/ max. Frequency: 28kHz to 40kHz Time: 5 min max.
(3) Cleaner
1. Alternative cleaner
   • Isopropyl alcohol (IPA)
2. Aqueous agent
   • PINE ALPHA ST-100S
(4) There shall be no residual flux and residual cleaner after cleaning.
   In the case of using aqueous agent, products shall be dried completely after rinse with de-ionized water in order to remove the cleaner.
(5) Other cleaning
   Please contact us.

9-10. Handling of a substrate
After mounting products on a substrate, do not apply any stress to the product caused by bending or twisting to the substrate when cropping the substrate, inserting and removing a connector from the substrate or tightening screw to the substrate.
Excessive mechanical stress may cause cracking in the product.

9-11. Storage Conditions
(1) Storage period
   Use the products within 6 months after delivered. Solderability should be checked if this period is exceeded.
(2) Storage conditions
   • Products should be stored in the warehouse on the following conditions.
     Temperature : -10°C to 40°C
     Humidity : 15% to 85% relative humidity
     No rapid change on temperature and humidity
   • Don't keep products in corrosive gases such as sulfur, chlorine gas or acid, or it may cause oxidization of electrode, resulting in poor solderability.
   • Products should be stored on the palette for the prevention of the influence from humidity, dust and so on.
   • Products should be stored in the warehouse without heat shock, vibration, direct sunlight and so on.
   • Products should be stored under the airtight packaged condition.
(3) Delivery
   Care should be taken when transporting or handling product to avoid excessive vibration or mechanical shock.

MURATA MFG.CO., LTD.
10. **Note**
   
   (1) Please make sure that your product has been evaluated in view of your specifications with our product being mounted to your product.
   
   (2) You are requested not to use our product deviating from the agreed specifications.
   
   (3) The contents of this reference specification are subject to change without advance notice. Please approve our product specifications or transact the approval sheet for product specifications before ordering.
