</tr>
</tbody>
</table>

Measured common mode impedance may be included measurement error due to stray capacitance, residual inductance of test fixture.

To correct this error, the common mode impedance should be calculated as follows:

1. Measure admittance of the fixture (opened), Go  Bo.
2. Measure impedance of the fixture (shorted), Rs  Xs.
3. Measure admittance of the specimen, Gm  Bm.
4. Calculate corrected impedance |

\[ |Z| = \left( R_x^2 + X_x^2 \right)^{1/2} \]

Where

\[ R_x = \frac{G_m - G_o}{(G_m - G_o)^2 + (B_m - B_o)^2} - R_s \]

\[ X_x = \frac{- (B_m - B_o)}{(G_m - G_o)^2 + (B_m - B_o)^2} - X_s \]

12. P.C.B., Flux, Solder and Soldering condition

Test shall be done using P.C.B., Flux, Solder and Soldering condition which are specified in item 16 except the case of being specified special condition.
13. Common Mode Impedance (Zc) frequency characteristics (typical)

![Graph showing impedance vs frequency for different parts.]

14. Specification of Packaging

14.1 Packing Quantity

| Individual packaging | 100pcs |

14.2 Packing Method

IC foam of the stuck products are placed in an Individual packaging. A quantity in an Outer packaging is depending on a quantity of an order.

In some cases, omit the Buffer material and/or Corrugated cardboard.
14.3 Marking of packaging
(1) Individual packaging
The following items shall be marked on a label and the label is stuck on the Individual packing.
Customer part number, MURATA part number, Inspection number(*1), RoHS discrimination(*1)

*1) « Expression of Inspection No. » □□ OOOO XXX
(1) (2) (3)
(1) Factory Code
(2) Date
First digit : Year / Last digit of year
Second digit : Month / Jan. to Sep. → 1 to 9, Oct. to Dec. → O,N,D
(3) Serial No.
*2) « Expression of RoHS discrimination » ROHS – Y (△)
(1) (2)
(1) RoHS regulation conformity parts.
(2) MURATA classification number

(2) Marking for Outside package
The following items shall be marked on a label and the label is stuck on the outside package.
Customer name, Purchasing Order Number, Customer Part Number, MURATA part number,
RoHS discrimination(*2) , Quantity , etc

14.4 Specification of Outer Case

14.5 Marking for Outside package

(ex.)

Outer Case Dimensions (mm) Standard Individual package Quantity in Outer Case

<table>
<thead>
<tr>
<th>W</th>
<th>D</th>
<th>H</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>265</td>
<td>89</td>
<td>118</td>
<td>5</td>
</tr>
</tbody>
</table>

*Above Outer Case size is typical. It depends on a quantity of an order.

15 Caution

15.1 Mounting Direction
Mount products in right direction.
Wrong direction which is 90°rotated from right direction causes not only open or short circuit but also flames or other serious trouble.

15.2 Fail Safe
Be sure to provide an appropriate fail-safe function on your product to prevent from a second damage that may be caused by the abnormal function or the failure of our products.

15.3 Limitation of Applications
Please contact us before using our products for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property.

(1) Aircraft equipment
(2) Aerospace equipment
(3) Undersea equipment
(4) Power plant control equipment
(5) Medical equipment
(6) Transportation equipment (automobiles, trains, ships, etc.)
(7) Traffic signal equipment
(8) Disaster prevention / crime prevention equipment
(9) Data-processing equipment
(10) Applications of similar complexity and/or reliability requirements to the applications listed in the above

15.4 Attention regarding product's heat generation
Please pay special attention to the product's heat generation such as beyond Operating Temperature range, mounting product in close proximity to other products that radiate heat and beyond the rated current.
16. Notice
Products can only be soldered with reflow.
This product is designed for solder mounting.
Please consult us in advance for applying other mounting method such as conductive adhesive.

16.1 Flux and Solder

<table>
<thead>
<tr>
<th>Flux</th>
<th>Use rosin-based flux. Do not use highly acidic flux (with chlorine content exceeding 0.2(wt)%) Do not use water soluble flux.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solder</td>
<td>Use Sn-3.0Ag-0.5Cu solder</td>
</tr>
</tbody>
</table>

Other flux (except above) please contacts us for details, then use.

16.2 Soldering

(1) Standard flow soldering profile.

![Soldering Temperature and Time Chart]

(2) Resistance to soldering iron goes in the following condition that tip temperature is 350 °C max. and soldering time is 5 s max.

(3) Products and the leads should not be subjected to any mechanical stress during soldering process.

(1) Solder paste printing for reflow soldering
   - Standard thickness of solder paste should be 150 to 200 μm.
   Incidentally, depending on the reflow condition and the way of heat conduction, the solder would not wet up the terminal, being possible to lead to not enough connection between terminals and lands on the circuit board / open circuit in the circuit board. In case of use, always evaluate this part in your products with actual use condition.
   - For the solder paste printing pattern, use standard land dimensions.
   - For the resist and copper foil pattern, use standard land dimensions.
   - Use Sn-3.0Ag-0.5Cu solder

16.3 Cleaning Conditions

Products shall be cleaned on the following conditions.

(1) Cleaning temperature shall be limited to 60 °C max. (40 °C max. for IPA.)
(2) Ultrasonic cleaning shall comply with the following conditions, with avoiding the resonance phenomenon at the mounted products and P.C.B.
   - Power: 20W / l max.
   - Frequency: 28kHz to 40kHz
   - Time: 5 minutes max.
(3) Cleaner
   - 1. Cleaner
     - Isopropyl alcohol (IPA)
   - 2. Aqueous agent
     - Higher Alcohol Type (PINE ALPHA ST-100S)
(4) There shall be no residual flux and residual cleaner after cleaning.
   In the case of using aqueous agent, products shall be dried completely after rinse with de-ionized water in order to remove the cleaner.
(5) The surface of products may become dirty whitely after cleaning.
   But there is no deterioration on mechanical, electrical characteristics and reliability.
(6) Other cleaning
   Please contact us.

16.4 Operating Environment
Do not use this product under the following environmental conditions, on deterioration of the Insulation Resistance and/or corrosion of Inner Electrode may result from the use.

(1) In the corrodible atmosphere (acidic gas, alkaline gas, chlorine, sulfur gas, organic gas and etc.)
(2) In the atmosphere where liquid such as organic solvent, may splash on the products.
(3) In the atmosphere where the temperature / humidity changes rapidly and it is easy to dew.
(4) In the atmosphere where the product is covered with dust or is subjected to salty breeze.
16.5 Storage Conditions

(1) Storage period
Use the products within 12 months after delivered. Solderability should be checked if this period is exceeded.

(2) Storage conditions
• Products should be stored in the warehouse on the following conditions.
  Temperature: -10°C to 40°C
  Humidity: 15% to 85% relative humidity
  No rapid change on temperature and humidity
• Don't keep products in corrosive gases such as sulfur, chlorine gas or acid, or it may cause oxidization of electrode, resulting in poor solderability.
• Products should be stored on the palette for the prevention of the influence from humidity, dust and so on.
• Products should be stored in the warehouse without heat shock, vibration, direct sunlight and so on.
• Products should be stored under the airtight packaged condition.

(3) Delivery
Care should be taken when transporting or handling product to avoid excessive vibration or mechanical shock.

17. △ Note
(1) Please make sure that your product has been evaluated in view of your specifications with our product being mounted to your product.
(2) You are requested not to use our product deviating from the reference specifications.
(3) The contents of this reference specification are subject to change without advance notice.
  Please approve our product specifications or transact the approval sheet for product specifications before ordering.
